

## *Environmental Statement*

### **Our Activities**

Natural Power Wales are valued suppliers to our customer base in the following areas:

- Solar Thermal
- Rainwater Harvesting
- Underfloor Heating
- Ground and Air Source Heat Pumps

### **Environmental Priorities**

Natural Power Wales' policy is to conduct its business responsibly, with integrity, and with respect for the interests of all those affected by our operations. We believe that our activities should reduce CO2 emissions; generate economic benefits; create opportunities for an enhanced quality of life; respect the environment; and positively influence the communities in which we operate.

We aim to:

- Use energy, water and other natural resources efficiently, effectively and with care; minimise waste and recover or recycle it and finally, sustainably dispose of what is left.
- Limit light, noise, air, land and water pollution levels so as not to cause damage to existing natural systems.
- Value, protect and enhance the diversity of nature, local distinctiveness and cultural identity.
- Build long term relationships with our suppliers choosing as business partners those with standards and ethical practices compatible with our own.

Our specific objectives for 2010 are to:

- Install renewable energy systems for clients
- Improve overall energy efficiency and reduce our electricity usage by 2%
- Reduce waste sent to landfill
- Green our supply chain
- Reduce our CO2 emissions by 2%
- Enact further pollution prevention measures

### **Environmental Performance**

The company has had no major environmental incidents and there have been no convictions under environmental legislation.

In the last year we have:

- Improved recycling rates
- Installed PIR and timed lighting to reduce electricity usage
- Limited speeding and idling through use of vehicle tracking
- Improved staff awareness of environmental issues
- Encouraged our clients to install effective renewable energy systems
